# Where the 450 unseen-target queries end up

ONE view, seed17 (all three ONE seeds have the same hit-set counts). Full 216-candidate rankings remain unchanged.

- GTE hit retained by C4: 34 / 450 (7.6%)
- GTE hit lost after fusion: 32 / 450 (7.1%)
- GTE miss: seen competition: 35 / 450 (7.8%)
- GTE miss: unseen order >10: 349 / 450 (77.6%)

349/384 original GTE misses have no correct unseen label in the first 10 positions of the unseen internal order.

Internal order is a rank-identity diagnostic, not an evaluation with unseen-only candidate filtering.
